

Design and Construction Flat Panel Facilities

HELPING CLIENTS BUILD BETTER BUSINESSES, NOT JUST BETTER BUILDINGS

What Makes the IDC Difference?

Flat panel manufacturing facilities demand new levels of technological excellence and innovation. IDC has a proven record of excellence in the design and construction of some of the world's leading flat panel facilities.

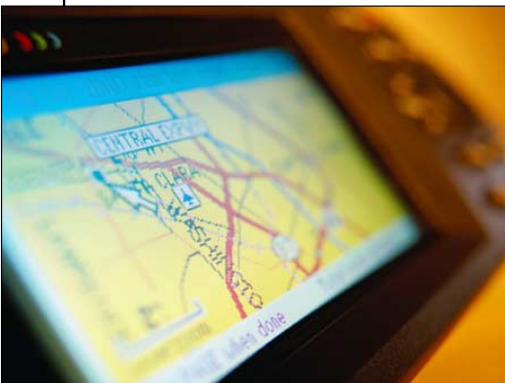

IDC's flat panel expertise is unique in industry. Our capabilities go well beyond the ability to deliver outstanding facilities.

We understand that the flat panel industry's future relies on the ability to transition new product technologies to low-cost, high-volume manufacturing. In addition to design and build services, we also help flat

panel clients reduce cost of ownership, forecast return on investment, and optimize the efficiency of operations.

IDC is the industry's top performer in fast-track delivery – helping flat panel clients stay competitive by meeting crucial “time to market” windows. We have experience with all aspects of opto/microelectronics facilities including:

- Manufacturing optimization
- Site planning
- Tool selection, layout and installation
- AMHS design
- Capital and operating cost reduction
- Facility operation services

IDC Services

IDC provides a complete range of facility planning, design, construction, procurement, and ongoing facility services from a single source of responsibility.
